PROFESSIONAL SUMMARY

B2B SaaS operations professional and Full Stack Development graduate who turns customer lifecycle challenges into structured workflows, reliable metrics and practical tools. Builds Python applications, analytics dashboards and data-quality workflows, combining experience in onboarding, retention, churn and recurring revenue with hands-on software development.

PROFESSIONAL EXPERIENCE

Customer Success & Operations Specialist (Contractor) | Tracionei | May 2026 - Present

- Manage B2B SaaS customer lifecycle processes, including onboarding, adoption, renewals, retention and operational follow-up.
- Analyze subscription, customer and billing data to investigate discrepancies and support reliable churn and MRR reporting.
- Structure CRM routines and reporting workflows, identifying repetitive work suitable for automation.

Customer Success Specialist, B2B Accounts | Telefônica (Vivo) | May 2021 - Oct 2025

- Supported corporate customers, coordinated issue resolution with technical teams and maintained CRM records and service follow-up.
- Identified recurring operational problems and translated business requirements into actionable resolutions.

SELECTED PROJECTS & IMPACT

Customer Success Analytics Dashboard | Operational analytics, revenue metrics, data validation

- Consolidated active accounts, cancellations, churn, lost MRR and cohort-level performance into a customer portfolio dashboard.
- Reconciled 46 customer records against billing information, corrected more than 10 discrepancies and recalculated nine months of historical metrics.

Customer Success Automation | Python, Streamlit, Pandas

- Built a portfolio-management application with customer health, follow-ups, renewals, onboarding tracking, tasks and analytics; created a public demo using fictional data, separate from the private environment.

Data Quality Studio | Python, Pandas, Streamlit

- Created an interactive CSV workflow for filtering, type conversion, date normalization and cleaned-data export.

ShipTrack API | Python, Flask, SQLite, pytest

- Developed a shipment-tracking REST API with persistent shipment and tracking-event records, UUID identifiers and status history.

TECHNICAL SKILLS

Programming & data: Python, Pandas, SQL, JavaScript, TypeScript, HTML/CSS; data cleaning, KPI reporting, churn and MRR analysis.

Frameworks & tools: Streamlit, Flask, React, Vite, Tailwind CSS, pytest, Git/GitHub, REST APIs, n8n.

Databases & practices: SQLite, PostgreSQL fundamentals, database modeling, Agile/Scrum, AI-assisted development.

EDUCATION & LANGUAGES

Technologist in Full Stack Development | Estácio University | 2024 - 2026 | Completed

Bachelor in Physical Education | Universidade Tuiuti do Paraná | 2019

Portuguese (native) | English (professional working proficiency) | Spanish (basic) | Italian (basic comprehension)
